Digitalization in Ports & Maritime Industry

The International Maritime Transport and Logistics Conference “Marlog 10” Digitalization in Ports & Maritime Industry

Introduction :

Over the past two decades, digital transformation has become an essential tool in the business sector which foretells a significant leap in the patterns of business, industries and supply chains as well as a potential change in the world trade map.

Considering that about 90% of the world trade volume is currently transported across seas and oceans, it is essential that ports, logistics and maritime transport industry be ready to meet and cope with the challenges expected from such digital transformation to keep its share of the world trade. In addition, digitalization of the maritime industry provides new opportunities to enhance the efficiency, productivity, and sustainability of logistics.

The concept of smart ports, aims to adopt digital technologies to enable better planning and management of activities and resources in ports and share real-time information concerning the supply chain. Digital technologies like big data, Internet of things, and block chain have recently been entered and used in supply chain management.

Digital technologies enable companies and authorities to create opportunities for transparency, efficiency and collaboration which hold great potential for all the parties involved in this industry.

The current and previous events and crises that the world is going through, such as Covid-19 epidemic, proved the need to maximize the benefits of digital transformation in the maritime transport and logistics industry as an optimum solution to reduce the consequences of such crises.

Objectives :

The conference aims to discuss the horizons of digitalization in ports, logistics and maritime industry through the following topics:

- Digital Transformation in Ports: Challenges & Opportunities.
- Smart Logistics and Supply Chain Management
- Innovative Artificial Intelligence & Robotics technologies for port operation
- Digital Ecosystems for smart ports
- Cybersecurity Risk management and assessment
- The Role of digitalization of ports in reducing Covid19 consequences
- Modern trends for enhancing human resources capabilities in maritime industry within digital transformation

Themes :

1 Digital Transformation in Port Services Administration & Marketing

- Shipping digitalization management (concepts, strategies & business models).
- Motives for digital transformation in the container shipping sector.
- Digital tools to increase efficiency in operations, safety and reliability.
- Digitalization of maritime freight market.
- The role of data analytic in the integration of governance systems in ports.

2 Digitalization of Supply Chain: Implications for Future

- Digital smart logistics: Concepts and strategic perspective.
- The role of digitalization of supply chain on blockchain integration.
- Digital supply chain towards smart management and operation.
- Preliminary considerations for 4IR-driven supply chains.
- Industry 4.0 and supply chain sustainability.

3 The Role of Digital Transformation of Ports to Reduce COVID-19 Consequences

- COVID-19 to accelerate digitalization of the maritime industry.
- The role of digitalization of ports to drive post-COVID-19 recovery.
- Analysis of COVID-19 impact on shipping based on Big Data.
- Innovative smart solutions for ports in the era of COVID-19.

4 Artificial Intelligence and Robotics: Ports and Logistics

- Modern Artificial Intelligence Applications in intermodal transportation.
- Business intelligence competencies for port community systems.
- Smart port-city: A catalyst for the global world economy development.
- Autonomous shipping and inland navigation.
- Machine learning innovations in container terminals.

Themes :

5 Cybersecurity Risk Management in Maritime and Logistics Industry

- Cyber risk challenges in the maritime transport systems.
- Cybersecurity assessments for critical port infrastructure.
- IOT solutions for risk assessment in ports.
- Cloud computing security issues and solutions in maritime and logistics industry.

6 Smart Ports Entrepreneurial Ecosystem Development

- Encouraging kick off port city ecosystems innovations.
- Smart Reliable and energy-saving solutions in ports.
- Digital business for maritime and logistics ecosystems.
- Smart Ecosystem - Success story (best practice).

7 Reinforcing Capacity Building for Supporting Digitalization in Ports and Maritime Industry

- Digital transformation of human resource management in maritime and logistics sector.
- Raising cybersecurity awareness in port and logistics community.
- Future Professions in the era of digitization of maritime industry.
- Promote peer-to-peer learning and knowledge sharing in the workplace.
